### DA?

#### (DA?) Dry amygdalina something

<b>Date</b>	17 May 2024	<b>E</b>	<b>N</b>
<b>Observer</b>	Fiona Walsh		
<b>Notes</b>	DA something. Not sure if it was DAS, but it wasn't DAC, and probably not really WOB which is mapped as... Not DPU which is nearby. Was only a small patch, probably less than 0.5 hectares. But it doesn't really matter for today, because I am here for fun, not for vegetation mapping. Could also just be a grassy dominated bit of an edge.
